

Teacher's Name: Suchita Patil (Grad 3 to 5 Maths, Evs)
(The Suman Nirmal Minda School)

From this 3 days training program I have got a new perspective of teaching and learning. It helped me a lot to make my classes more attentive and through this AIFA pedagogy we can reach & teach each and every student. This can also avoid the distractions of students as each student is involved in each activity. By random pairing they can be socialized well. The understanding of concepts through AIFA can help them to recognise it throughout their life as it is through doing by themselves and also visualization. Also self learning is the best way of learning which is introduced by AIFA.

The books provided by AIFA pedagogy are also so interactive. For teachers too it is much easy to explain the concepts as all the prompts are clearly given.

Our trainers explained us each and every aspect of AIFA very well. So overall session was wonderful & experience was so good.

Thank you.

10/10.
